

CHEMISTRY COLLOQUIUM

Dr. Edward Grabowski Merck Research Labs (Retired)

Wednesday, April 10, 12:00 pm
140 Hutchison Hall
Lander Auditorium
University of Rochester
Department of Chemistry

Title: “Unexpected Transformations in Heterocyclic Chemistry”

Abstract: Examples of unanticipated reactions in heterocyclic systems gleaned from the speaker’s 39 year career in Chemical Development with the Merck Research Labs will be presented. Studies aimed at establishing the most probable reaction paths for these transformations will be described, along with applications of the newly defined chemistry to the solutions of the problems at hand.

Host: Professor Todd Krauss • Email: krauss@chem.rochester.edu
